

NAVINA SMART DATA

Advancing
TAI together

Navina™

Advancing TAI together

Navina™ Smart Data is a unique source of information providing knowledge in the field of transanal irrigation (TAI).

The database holds anonymized irrigation data from Navina Smart users in real life settings, from all over the world. Data is collated from the Navina Smart App and as a prescriber of Navina Smart you contribute to build this unique database which will provide you and other healthcare professionals with valuable insights about TAI therapy.

Register today and get access to data such as:

- Irrigation data
- Neurological Bowel Dysfunction (NBD) score
- Satisfaction rates and much more.

Apply for your personal access at navinadata.wellspect.com

Wellspect HealthCare, Aminogatan 1, P.O. Box 14, SE-431 21 Mölndal, Sweden. Phone: +46 31 376 40 00.

“Beyond helping the individual patient, this data may also provide rich research data about irrigation parameters used by patients in a real life setting, and how this correlates with outcome”

*Prof. Anton Emmanuel
Neurogastroenterologist*

Navina Smart App

Can allow you and the user to track irrigation results, optimize the therapy and effectively manage bowel routines – and at the same time contribute to build the data base to advance TAI.
